Citation Index?

#### Citation Indexes for Science

A New Dimension in Documentation through Association of Ideas

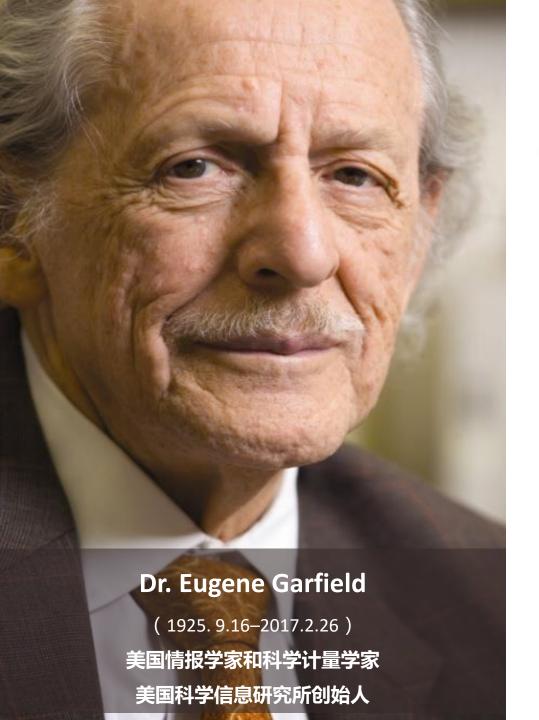

Eugene Garfield

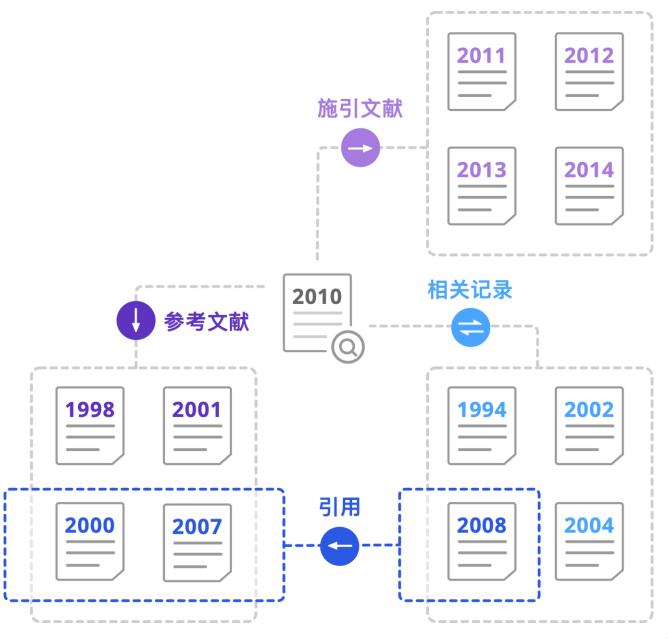

"The uncritical citation of disputed data by a writer, whether it be deliberate or not, is a serious matter. Of course, knowingly propagandizing unsubstantiated claims is particularly abhorrent, but just as many naive students may be swayed by unfounded assertions presented by a writer who is unaware of the criticisms. Buried in scholarly journals, critical notes are increasingly likely to be overlooked with the passage of time, while the studies to which they pertain, having been reported more widely, are

approach to subject control of the literature of science. By virtue of its different construction, it tends to bring together material that would never be collated by the usual subject indexing. It is best described as an association-of-ideas index, and it gives the reader as much leeway as he requires. Suggestiveness through association-of-ideas is offered by conventional subject indexes but only within the limits of a particular subject heading.

If one considers the book as the macro unit of thought and the periodical article Unique Data 独特

• Dr. Garfield 1955年在 *Science* 发表论文提出将引文索引作为一种新的文献检索与分类工具:将一篇文献作为检索字段从而跟踪一个Idea的发展过程及学科之间的交叉渗透的关系。

#### The core of 'design thinking' and its application

By: Dorst, K (Dorst, Kees) 1, 2

View Web of Science ResearcherID and ORCID (provided by Clarivate)

#### DESIGN STUDIES

Volume: 32 Issue: 6 Page: 521-532 Special Issue: SI

DOI: 10.1016/j.destud.2011.07.006

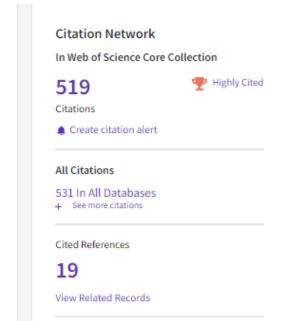

Published: NOV 2011 Document Type: Article

#### Abstract

In the last few years, "Design Thinking" has gained popularity - it is now seen as an exciting new paradigm for dealing with problems in sectors as far afield as IT, Business, Education and Medicine. This potential success challenges the design research community to provide unambiguous answers to two key questions: "What is the core of Design Thinking?" and "What could it bring to practitioners and organisations in other fields?". We sketch a partial answer by considering the fundamental reasoning pattern behind design, and then looking at the core design practices of framing and frame creation. The paper ends with an exploration of the way in which these core design practices can be adopted for organisational problem solving and innovation. (C) 2011 Elsevier Ltd. All rights reserved.

Master Journal List

## Browse, search, and explore journals indexed in the Web of Science

The Master Journal List is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the Web of Science platform. Spanning all disciplines and regions, Web of Science Core Collection is at the heart of the Web of Science platform. Curated with care by an expert team of in-house editors, Web of Science Core Collection includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the Web of Science Core Collection, you can search across the following specialty collections: Biological Abstracts, BIOSIS Previews, Zoological Record, and Current Contents Connect, as well as the Chemical Information products.

Search Journal, ISSN or title word...

### On Hold

Concerns have been raised about the quality of the content published in this journal. The journal is being re-evaluated according to our selection criteria; new content will not be indexed during the course of the re-evaluation.

When the evaluation is complete, the publisher will be informed of the outcome and the journal will either:

- be removed from coverage if it no longer meets the quality criteria
- or remain covered if it continues to meet the quality criteria.

If the journal meets the quality criteria, any missing content will be indexed. If the journal is removed from coverage, content will not be backfilled. In the most serious cases of breaches in a journal's editorial standards, as determined by our selection criteria, published content may be removed from Web of Science. Timeframes for completing a reevaluation will depend on the particular circumstances of each case.

摘要

查看PDF

Conventional wastew ent with primary and secondary treatment processes efficiently remove microplastics (MPs) from the wastewater. Despite the efficient remove all effluents can act as entrance route of MPs, given the large volumes constantly discharged into the aquatic environments. This study investigated the removal of MPs from effluent in four different municipal wastewater treatment plants utilizing different malestage treatment technologies. The study included membrane bioreactor treating primary effluent and different terriary treatment.

al-stage treatment technologies. The study included membrane bioreactor treating primary effluent and different tertiary treatment discfilter, rapid sand filtration and dissolved air flotation) treating secondary effluent. The MBR removed 99.9% of MPs during the om 6.9 to 0.005 MP L-1), rapid sand filter 97% (from 0.7 to 0.02 MP L-1), dissolved air flotation 95% (from 2.0 to 0.1 MP L-1) and discfilter 40-um 0.5 - 2.0 to 0.03-03 MP L-1) of the MPs during the treatment. Our study shows that with advanced final-stage wastewater treatment.
